DATA MANAGEMENT, BUSINESS INTELLIGENCE & ANALYTICS SOLUTIONS

Optimize Your Decision Making with Better Data Insights

LET YOUR DATA WORK FOR YOU

Are you struggling to make confident, data-driven business decisions? The ability to capture infinite data points has never been as vast as it is today. But with that capacity comes the challenge of identifying, connecting, managing, and analyzing data in a way that supports your business needs. Core DTS offers data management, business intelligence, and data analytics solutions to help you gain actionable insights for data-driven business decisions.

Data Management

Well-structured, high-quality data is the root of all reliable information. Coretelligent's data management solutions will help you ensure your data is accessible, accurate, secure, and actionable using services that fit your unique needs. Data management services we provide include data architecture, data warehousing, master data management, ETL (extract, transfer, load), data quality, integration with ERP, data marts, CRMs and more.

Business Intelligence

Transforming your data into actionable insights requires strategy and organization. Our team will work with you to assess your goals and objectives and customize a plan that leverages the power of your data. We will help you implement and integrate buisness intelligence (BI) technologies and provide support so you can continue making data-driven decisions for your company with confidence.

Data Analytics & Visualizations

Coretelligent offers end-to-end analytics and visualization services that strengthen your organization with critical insights and easily identifiable metrics. We offer custom dashboards, complex visualizations, KPI and ROI assessments, integration with data warehouses, web and mobile apps, exception reporting, predictive analytics, and more. Our team can help you gain a solid strategic vision and get key insights from large amounts of structured and unstructured data from defined and dynamic sources.

BUSINESS USE CASES

- **Life Sciences:** Developed an online solution to safeguard sensitive health data with security and privacy for a biotech client.

- **Financial Services:** Built a robust data warehouse with data organized and staged to make queries and reporting fast and accessible for a financial services client.

- **Professional Services:** Created greater visibility into business data via custom dashboards to showcase customer insights, revenue, and sales.

BENEFITS

- **Data-driven decisions:** trustworthy insights from expanded reporting, visualizations, and expertly developed strategy

- **Cost savings:** removal of non-critical enterprise or operational functions

- **More reliable, effective, and accessible data:** reduction of manual touchpoints and human error complemented by streamlined, agile processes

- **Increased revenue:** better leveraged core business functions
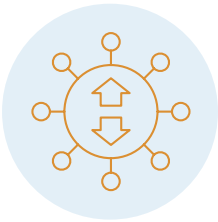

coretelligent
THE POWER OF IT

HOW IT WORKS?

Unlike other service providers, we have the expertise and resources to develop your business transformation project as well as provide ongoing maintenance and support. We call this our **Build and Operate** methodology.

BUILD

Our experts will meet with your team to learn about your environment and identify opportunities for streamlining and optimizing processes that will seamlessly integrate into your existing infrastructure and operations. From there, we will develop and implement the solution that fits your unique needs.

OPERATE

Coretelligent will work in partnership with you to align technology and strategy at the size and scale you need to solve the challenges you are facing. This includes ensuring your solution continues to serve you now and in the future. We will help support, monitor, and maintain your technology investment to help keep you running at peak performance.
