

CoreArmor Govern

Governance That's Always On, Always Aligned

CoreArmor Govern is a strategic governance, risk, and compliance solution. Designed to strengthen your IT posture and simplify compliance, it also provides executive-level oversight without adding headcount. With expert vCISO leadership and a unified GRC platform, CoreArmor Govern helps you operationalize governance, align risk and security programs, and stay audit-ready year-round.

What does CoreArmor Govern bring to your business?

Expert vCISO Oversight

Strategic guidance, roadmap planning, and board-level visibility – built into your governance program

Centralized GRC Platform

Manage risk registers, compliance controls, audit tasks, and policy workflows from one integrated system

Operationalized IT Governance

Build resilience with a defined controls framework, vendor governance, insurance readiness, and business impact analysis

Audit-Ready Compliance

Replace last-minute scrambles with automated audit prep, structured due diligence, and clear executive reporting that builds trust with stakeholders

Risk Visibility & Accountability

Scorecards, maturity models, and compliance dashboards give leadership clarity into performance, exposure, and readiness

→ What sets CoreArmor Govern apart?

Most compliance programs are fragmented, reactive, or treated as check-the-box exercises. CoreArmor Govern replaces that noise with clarity – uniting governance workflows, oversight, and automation in a single, strategic program delivered by professionals who understand your business.
